Sound that surrounds

There's ordinary sound. And there's sound that takes you out of yourself - breathtaking, hair-raising, spine-tingling.

If that's what you want, it makes sense to go to people who've been making great speakers for a lifetime like Celestion. Listen to our new AVP100 system and you'll immediately see what a massive difference it makes. Suddenly you hear details you never knew existed, even on your favourite tracks. With movies - especially on DVD - the atmosphere instantly engulfs you. You're right there, with the action on screen.

New dimensions

A full 5.1 system (four identical satellite speakers, a centre channel and a serious subwoofer) in one pack, AVP100 creates a spacious and intricate sound stage in real rooms. Your room.

Unlike many others in the price range, each satellite speaker has two drivers: a high performance hard dome tweeter and a separate bass/midrange cone. So voices sound incredibly real. Music moves you like never before. And with its own on board 100 Watt power amp, the downfiring subwoofer delivers the big, well-defined bass you need for heavyweight special effects. Magnetically shielded to avoid interfering with other electronics, it's a system that punches way beyond its size.

A new world of enjoyment

Designed from the start by expert acoustic engineers to get the most out of digital home entertainment formats, AVP100 makes you realise what you've been missing.

As a two-way sealed box design, it plays loud and it plays true - and unlike the usual boring boxes, it looks as good as it sounds. The technology is sensational because it heightens your senses. It gets to your nerve endings and makes your heart soar. The sense of involvement is breathtaking.

If you want to experience real sound, AVP100 is the logical upgrade.

Enjoy.
